

Primary Writing Workshop Primary 4 to Primary 6

Dear Parents,

FirstClass Academy is pleased to announce the commencement of its primary and secondary-level English Writing Workshops. These workshops were designed in order to facilitate student's writing and independent thinking skills in line with the requirements of the New Senior Secondary Curriculum.

Areas emphasized include early research skills, formulating and organizing of ideas and writing skills.

Conducted by a fully-qualified, Native English-speaking teacher, students will be taught how to approach writing in a well-rounded way, employing the tools needed to construct original text in the best format to answer the task's requirements.

Primary Writing (P.4 – P.6) explores key words, sentence starters, thinking and speaking ideas, group paragraph writing & reading, and students reading of works.

It is important to introduce these skills at a primary level so students will have practical knowledge behind the emphasis on 'independent thinking' that they are likely to face in later years. The skills presented in this workshop are universal to all levels of schooling and will give interested students the necessary support to excel both now and in the years to come.

Both new and existing FirstClass Academy students are welcome to attend. For more information or general inquiries, please email help@firstclass.com.hk and state the Subject as "Primary Writing (P.4 – P.6)"

Best Regards,
Keith McMullen, Instructor
